International Scenario for Accreditation

Accreditation

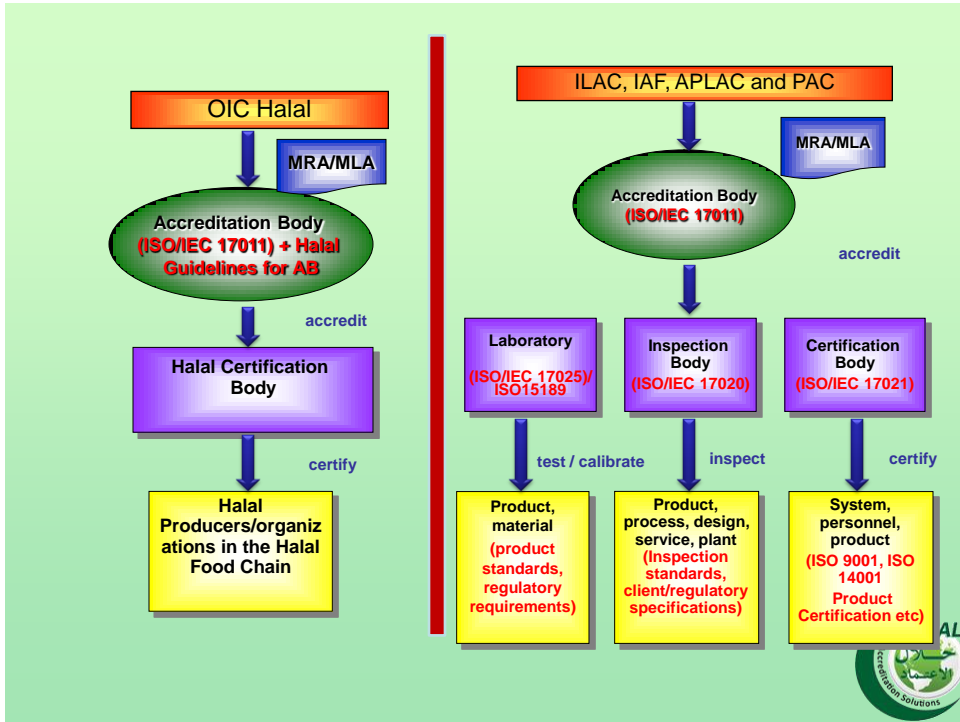

What is MLA & How it can help in One Standard One Logo Theme

MLA/MRA form a **regional /international arrangement** of certification bodies, Inspection Bodies & Laboratories accredited by Accreditation Bodies.

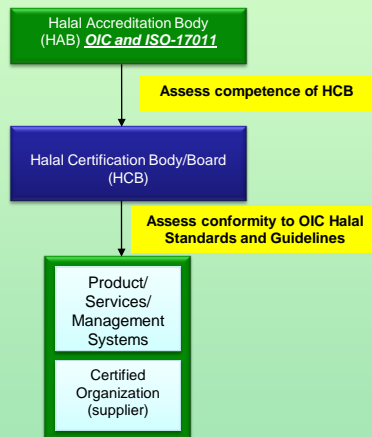

This arrangement facilitate the acceptance of certifications/tests reports in the region, thus contribute to the facilitation of trade.

Accredited in one country, accepted everywhere in the world because of MLA/MRA Logo.

OIC/SMIIC Guideline for the Halal Accreditation Body & Accrediting Halal Certification

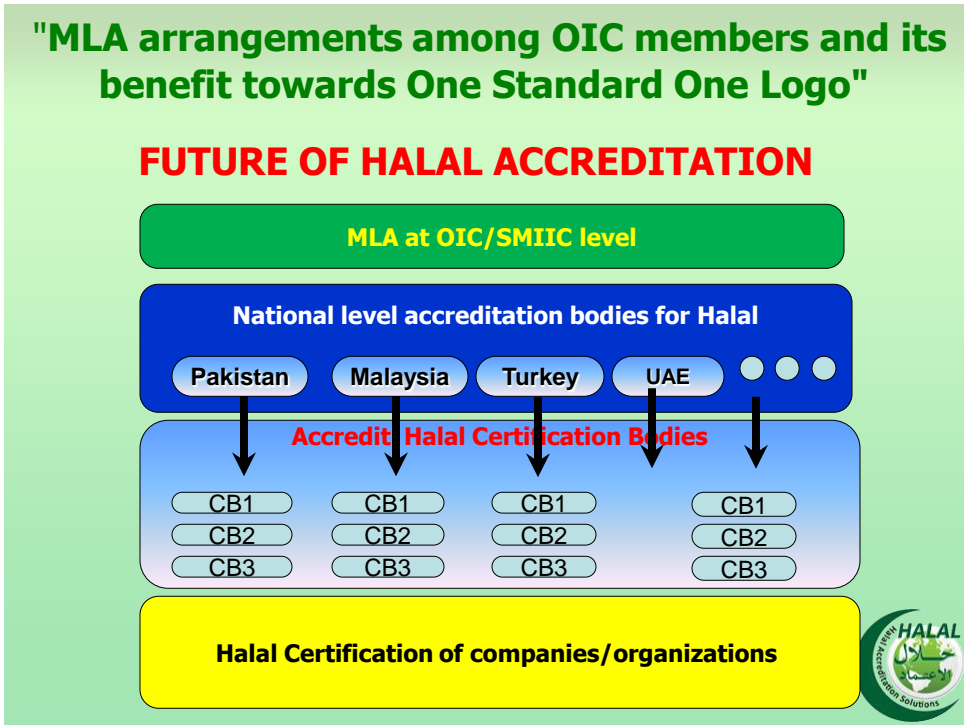

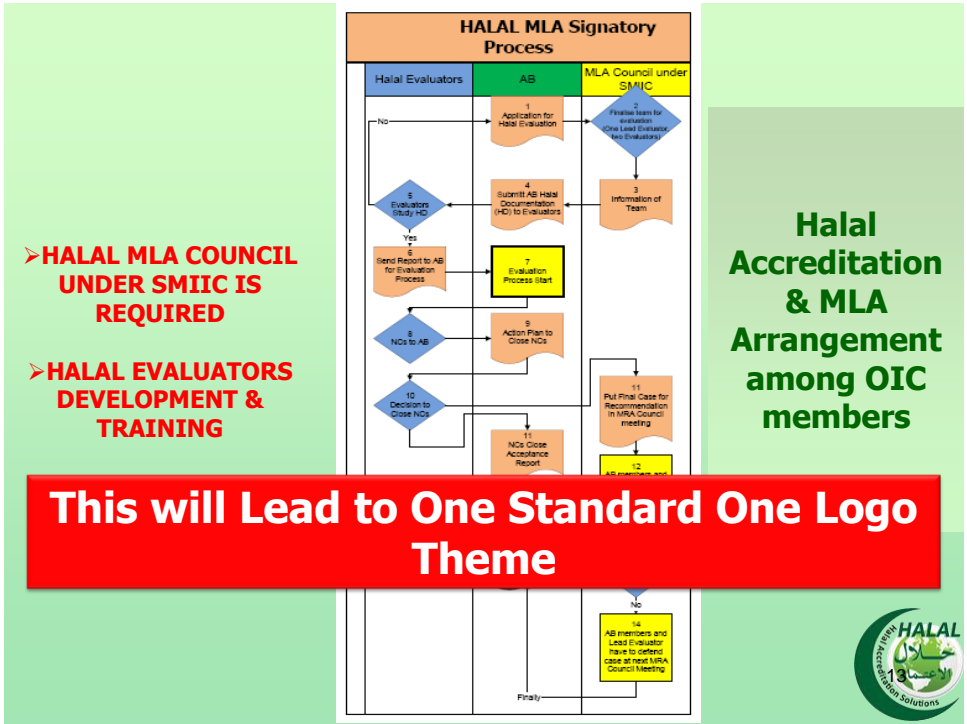

HABs assess the competence of HCBs. They can facilitate trade by promoting global acceptance of conformity assessment results issued by accredited HCBs. This is strengthened if they are peer-evaluated and are members of *mutual recognition arrangements (MRA)* among the accreditation bodies of OIC member states.

HCBs assess conformity of products/services and suppliers to specifications/requirements and additional Halal requirements.

Consumers/customers/clients/purchasers acquire products/services that conform to specifications and additional Halal requirements or buy supplier that conform to specific and Halal requirements. Regulatory authorities may set additional Halal requirements for products/services and suppliers.

"MLA arrangements among OIC members and its benefit towards One Standard One Logo"
